

CAREER OBJECTIVE

Goal-driven Software Engineer with expertise in AI/ML solutions, Python, and cloud platforms. Adept at designing and deploying scalable AI use cases with a strong focus on delivering business impact through robust and efficient systems. Ready to contribute innovative solutions to challenging problems in AI/ML development.

PROFESSIONAL SUMMARY

- 7+ years of experience in software development, with 4+ years specializing in AI/ML model design and deployment.
- Proficient in web development using Python and Django, including MVC architecture.
- Designed and implemented large-scale business-critical systems using Object-Oriented Design and Programming concepts.
- Strong expertise in **AWS services** including EC2, Lambda, S3, and CloudFormation for scalable infrastructure.
- Minimal experience with **GCP**, including Cloud Run and Vertex AI, for AI/ML model deployment.
- Skilled in developing scalable web applications and improving website performance.
- Proficient in front-end technologies, including HTML, CSS, and JavaScript.
- Expertise in production support, deployment using AWS, and version control tools like Git.
- Experienced in RESTful development and verification and validation tools for Python coding.

Machine Learning Expertise:

- Implemented and deployed ML models for predictive analytics and decision-making in business applications.
 - Experience with **Supervised and Unsupervised Learning**, including regression, classification, clustering, and anomaly detection.
 - Worked on **Natural Language Processing (NLP)** applications, including text summarization and sentiment analysis.
 - Developed and fine-tuned **Large Language Models (LLMs)** and integrated them using **Lang Chain** for RAG-based applications.
 - Hands-on experience with **TensorFlow, PyTorch, Scikit-learn, and OpenAI APIs** for model training and inference.
 - Implemented **Retrieval-Augmented Generation (RAG)** using Lang Chain on structured (Databricks, SQL) and unstructured data (Blob Storage).
 - Optimized AI model performance for scalability and efficiency in cloud-based environments.
- Excellent working knowledge of UNIX and Linux shell environments.
 - Highly motivated, quality-minded developer with proven ability to deliver applications against tight deadlines.
 - Strong interpersonal, analytical, and presentation skills, with the ability to work in both self-managed and team environments.

TECHNICAL SKILLS

- **Languages:** Python, SQL, OOPS Concepts
- **AI/ML Frameworks:** TensorFlow, PyTorch, Hugging Face, Lang Chain
- **Cloud Platforms:** AWS (S3, EC2, Lambda), GCP (minimal with Cloud Run, Vertex AI)
- **Web Development:** Django, Flask, HTML, CSS, JavaScript
- **Tools:** Git, PyCharm, Jupyter Notebook, verification and validation tools for Python
- **Databases:** MySQL, Oracle, Databricks, SQL
- **Operating Systems:** Linux/Unix, Windows

ACHIEVEMENTS

- Received OPERATIONAL EXCELLENCE award for consistent and excellent performance focusing on client

results.

EDUCATION

- Bachelor of Technology in Computer Science & Engineering (B-Tech) from JNTUH University,

PROFESSIONAL EXPERIENCE

Senior Developer, EagleNet LLC. (March 2021 - Present)

- Designed, developed, and deployed AI/ML use cases using Python, TensorFlow, and PyTorch.
- Built robust and scalable systems leveraging **AWS** for deployments and operational efficiency.
- Conducted data analysis and implemented SQL-based data solutions for insights and reporting.
- Collaborated with cross-functional teams to translate business requirements into technical solutions.
- Developed and maintained web applications using Django and RESTful APIs.
- Contributed to the continuous improvement of AI/ML infrastructure and deployment processes.

Python Django Developer, HDFC ERGO (August 2018 - March 2021)

- Led the development of motor insurance SaaS applications, implementing premium calculation and policy renewal features.
- Designed scalable back-end solutions and API endpoints for enterprise applications.
- Enhanced application performance and user experience through optimization.

PROJECT DETAILS

AI Foundry Development (2021 – Present)

Domain: AI/ML Applications

- Designed and deployed AI models using TensorFlow and Vertex AI, driving the development of scalable and reliable machine learning solutions.
- Built and optimized data pipelines to handle high-volume structured and unstructured data efficiently.
- Collaborated with cross-functional teams to identify business requirements and translate them into technical AI/ML use cases.
- Leveraged Google Cloud Platform (GCP) services like Cloud Run to implement automated workflows for model training and deployment.
- Conducted model performance tuning, achieving a 25% improvement in prediction accuracy.
- Developed comprehensive documentation for the AI/ML processes to ensure maintainability and ease of updates.

S3 Content Moderation using Hugging Face (2021 – Present)

Domain: Content Moderation and Compliance

- Built an automated content moderation system using Hugging Face pre-trained models for analyzing text and image content.
- Developed scalable AWS Lambda functions for on-demand moderation of content uploaded to S3.
- Enhanced compliance by implementing real-time content flagging mechanisms, reducing review time by 40%.
- Orchestrated workflows for integrating moderation pipelines with external APIs to trigger notifications and generate detailed reports.

- Improved moderation performance through fine-tuning pre-trained models on domain-specific datasets, increasing detection accuracy by 30%.
- Ensured system scalability to handle over 1 million content items monthly with zero downtime.

Rinx Mobile Application (2021 – 2023)

Domain: OTT Media Streaming, Subscription Management, and AI-Driven Features

- Designed and implemented **subscription management workflows** using **Revenue Cat REST APIs** for Android and iOS platforms.
- Built AI-powered **chatbots** to assist users with subscription queries and provide personalized recommendations.
- Leveraged **TensorFlow** and **PyTorch** frameworks for advanced recommendation systems, enhancing content delivery.
- Developed **data analysis pipelines** using SQL to track subscription trends and predict user behavior.
- Collaborated with data scientists to develop predictive models, increasing user retention by 25%.
- Optimized API response times and data retrieval mechanisms, improving app performance by 30%.
- Conducted testing across various devices, ensuring a 99% crash-free performance rate.

IXC Web and TV Applications (2023 – Present)

Domain: Digital Signage, OTT, AI-Powered Moderation, and Casting Solutions

- Designed and deployed **AI/ML models** for content moderation, filtering hate speech, and inappropriate material using **Hugging Face** and **custom frameworks**.
- Developed APIs for casting **digital signage boards** with real-time updates, ensuring seamless IoT integration.
- Utilized **AWS Lambda** and serverless architecture for scalable, event-driven applications.
- Implemented **TensorFlow** for recommendation engines and automated content classification workflows.
- Created secure **HLS streaming platforms** for delivering high-quality video content globally.
- Integrated **Stripe Payments** for handling subscriptions, enabling seamless billing for thousands of transactions monthly.
- Built **real-time analytics dashboards** powered by AI to monitor content performance and user behavior.

Motor Insurance SaaS Platform (2017 – 2021)

Domain: Insurance

- Designed and developed a B2B SaaS platform for motor insurance policy management using Django and MySQL.
- Automated policy renewal notifications via email, SMS, and in-app messages, increasing customer retention by 20%.
- Integrated secure payment gateways to streamline the policy purchase and renewal processes.
- Developed a real-time dashboard for operational insights, empowering teams to track policy performance and customer engagement.
- Implemented a highly scalable backend architecture, supporting over 100,000 active policies with minimal latency.
- Reduced operational costs by automating manual workflows using Celery and background task processing.

PERSONAL DETAILS

- **Father's Name:** Rajender
- **Gender:** Male
- **Marital Status:** Married
- **Nationality:** Indian
- **Languages Known:** English, Telugu, Hindi

DECLARATION

I hereby declare that all the information provided is true to the best of my knowledge.
